DETAILED ACTION

Election/Restrictions

1. Claims 13-16 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Applicant timely traversed the restriction (election) requirement in the reply filed on 9/29/2004.

2. Applicant's election with traverse of Group I in the reply filed on 9/29/2004 is acknowledged. The traversal is on the ground(s) that there is no evidence or technical reasoning to support the conclusion that Groups I and II are independent and distinct inventions. This is not found persuasive because it is known that compositions can be used for other than coating purposes.

The requirement is still deemed proper and is therefore made FINAL.

3. The applicant has also elected the propane-derived compound as the surface-tension-reducing agent and the propanol-derived compound as the liquid carrier. However, because a search did not produce the propane-derived compound, all claims to the fluorocarbon surface-tension-reducing agent have been examined.

Claims 1-10 have been examined.

Specification

4. The use of trademarks such as HFC365mfc and HFC245fa has been noted in this application. They should be capitalized wherever they appear and be accompanied by the generic terminology.

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 2, 4, 8 and 9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a) Claims 4, 8 and 9 contain what appear to be trademarks – HFC 245fa and HFC 365mfc.

Trademarks are not constant over time, and should not be used in claims.

b) Claim 2: it is not clear what “liner” means in claim 2.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 1-3 and 6 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by EP 1056078.

'0778 teaches coating a recording disk with a solution of a fluorinated cyclic alkane or alkene, dye as coating moiety, and a solvent such as the fluorinated alcohol $\text{HCF}_2\text{CF}_2\text{CH}_2\text{OH}$ (2,2,3,3-tetrafluoropropanol) (see Abstract, 3:10-53, claim 16).

Claim Rejections - 35 USC § 103

9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

10. Claims 5 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP 1056078.

'078 is applied here for the reasons given above.

Art Unit: 1762

'078 teaches that the fluorinated alkane or alkene to fluorinated alcohol volume ratio is 50:50-1:99 (see claim 15), which overlaps with applicant's claimed ranges.

The weight % of dye appears to be about 1.5 %, which overlaps with applicant's range.

The subject matter as a whole would have been obvious to one having ordinary skill in the art at the time the invention was made to have selected the overlapping portion of the range disclosed by the reference because overlapping ranges have been held to be a prima facie case of obviousness. See *In re Malagari* 182 USPQ 549.

Allowable Subject Matter

11. Claims 4 and 8-10 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

12. The following is a statement of reasons for the indication of allowable subject matter:

The prior art does not disclose nor suggest the particular fluorinated compounds of claims 4, 8 or 9 in the composition of claim 1.

Conclusion

13. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
